Oroville Dam Auxiliary Spillway Incident

On 05/08/17 at 0928 hours the California State Warning Center (CSWC) was advised by the Department of Water Resources (DWR) that they will begin the scheduled increase in flows to the Feather River on 05/10/17 at 0500 hours.

- Total flow will gradually increase from 7,750 cfs to approximately 30,000 cfs by 1130 hours.
- The Oroville Dam Flood Control Spillway flow will increase to 30,000 cfs.
- Hyatt Powerplant will be operated as needed to meet ramping and storage demands.

Per the DWR Flood Operations Center and California Data Exchange Center (CDEC) [as of 05/09/17 at 0600 hours](#):

- Inflow: [15,861](#) cfs.
- Outflow: [7,870](#) cfs.
- The current lake elevation is [847.73](#) feet.

Mission Tasking

- 2017-SOC-33363: Road Repair (Butte County) – On Scene.
- 2017-CalOES-34685: Asbestos Monitor (Butte County) – On Scene.

SITUATION SUMMARY

2017 February Storms

Cal OES Coastal Region

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

Per the Cal OES Coastal Duty Officer (CDO), as of 04/27/17, Hwy 1 from the south is closed at Ragged Point and is open at specific intervals to local traffic only. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

Cal OES Inland Region

River Forecast - The following rivers are forecast to meet or exceed Flood stage:

Placer County:

- Truckee River at Truckee is forecast to be at flood stage at 4.5 feet the evening of 05/09/17.
 - Potential Impacts: Flood Stage. Minor flooding from Bear Creek in the Alpine Meadows area to Truckee. Truckee River bike path between the River Ranch at Alpine Meadows Road to Tahoe City begins to flood. Basements and yards of some low-lying homes along the river begin to flood. Deep Creek Campground begins to flood. About 2270 cfs. USGS estimates this much flow has about a 1 in 4 chance of being exceeded any year.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Alpine County: West Fork Carson River at Woodfords, East Fork Carson River at Markleeville
- San Joaquin County: San Joaquin River at Vernalis
- Stanislaus County: Tuolumne River at Modesto
- Merced County: Merced River at Stevinson

WEATHER SYNOPSIS BY REGION

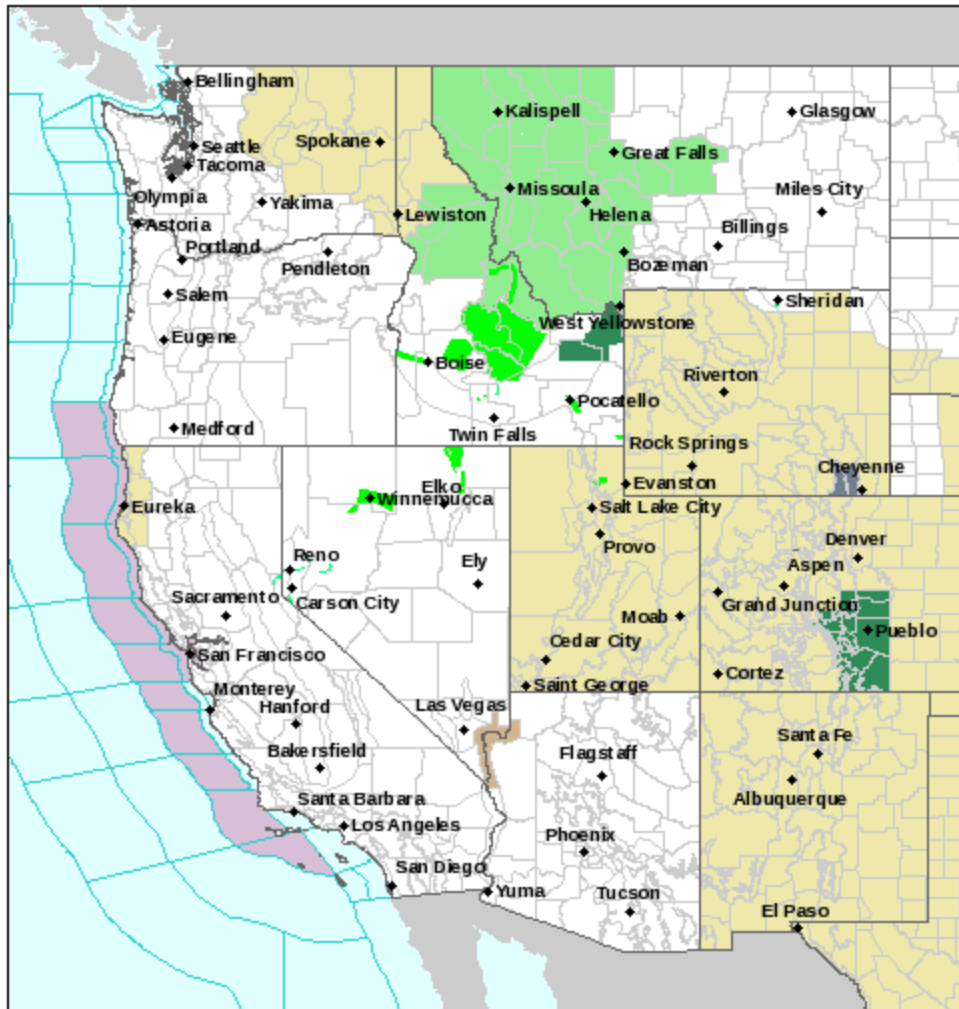

NORTHERN CALIFORNIA

We will see a weather pattern over Northern California similar to what we had the latter half of last week with a high pressure ridge and warming trend for the next few days followed by another low pressure trough approaching the coast and moving ashore Wednesday. The warmest inland areas will be in the low and mid 90s again today at around 8 degrees above normal, and cooling will start Wednesday with the low and mid 70s again from Thursday through the weekend at 3-5 degrees below normal. A few light showers or isolated mountain thunderstorms could develop in the northern areas Wednesday afternoon and evening, but those events look more likely Thursday and Friday across the northern and eastern mountains. There will be some chance of light showers or isolated thunderstorms again Sunday afternoon and overnight. Some areas will have decidedly northerly winds today and Tuesday, then Wednesday through the weekend winds will remain southerly to westerly and be gusty more often than not for many areas.

SOUTHERN CALIFORNIA

The area of low pressure that brought showers and well below normal temperatures to the region this past weekend is now over Northern Baja. Wrap around moisture from this low pressure area will bring isolated showers and thunderstorms to the mountains and deserts through tonight. Temperatures will warm to near normal today and then remain near normal today, with 60s to low 70s across the mountains and mid 70s to mid 80s in the valleys. Minimum humidity will be above 30% across most of the region through today. A weak ridge of high pressure will build into the region from the Pacific Ocean bringing a little warming Wednesday and Thursday. Another trough will drop down the West Coast bringing a cooling trend Friday through this weekend. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes Thursday afternoon through this weekend.

Cal OES MISSIONS

Cal OES Missions

- **2016-IREOC-21748:** Tasking Caltrans to extend state highway right of way to facilitate hazard tree removal. This is a long term mission and is expected to remain in place through the summer months. **Mission Ongoing.**
- **2015-IREOC-19846:** One RAWS weather station to Amador OA – On scene 11/30/15, expected to be left in place until May 2017. **Mission Ongoing.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
